Whereas, there has been presented to the

## Secretary of Agriculture

An application requesting a certificate of protection for an alleged distinct variety of sexually reproduced, or tuber propagated plant, the name and description of which are contained in the application and exhibits, a copy of which is hereunto annexed and made a part hereof, and the various requirements of LAW in such cases made and provided have been complied with, and the title thereto is, from the records of the PLANT VARIETY PROTECTION OFFICE, in the applicant(s) indicated in the said copy, and Whereas, upon due examination made, the said applicant(s) is (are) adjudged to be entitled to a certificate of plant variety protection under the LAW.

Now, therefore, this certificate of plant variety protection is to grant unto the said applicant(s) and the successors, heirs or assigns of the said applicant(s) for the term of TWENTY years from the date of this grant, subject to the payment of the required fees and periodic replenishment of viable basic seed of the variety in a public repository as provided by LAW, the right to exclude others from selling the variety, or offering it for sale, or reproducing it, or importing it, or exporting it, or conditioning it for propagation, or stocking it for any of the above purposes, or using it in producing a hybrid or different variety therefrom, to the extent provided by the PLANT VARIETY PROTECTION ACT. (84 STAT. 1542, AS AMENDED, 7 U.S.C. 2321 ET SEQ.)

#### 'PH1W4Z'

In Testimony Whereof, I have hereunto set my hand and caused the seal of the Plant Variety Protection Office to be affixed at the City of Washington, D.C. this eleventh day of September, in the year two thousand and fourteen.

GENERAL INSTRUCTIONS: To be effectively filed with the Plant Variety Protection Office (PVPO), ALL of the following items must be received in the PVPO: (1) Completed application form signed by the owner; (2) completed exhibits A, B, C, E, F; (3) for a tuber reproduced variety, verification that a viable (in the sense that it will reproduce an entire plant) tissue culture will be deposited and maintained in an approved public repository; and (4) payment by credit card or check drawn on a U.S. bank for \$4,382 (\$518 filling fee and \$3,864 examination fee), payable to "Treasurer of the United States" (See Section 97.6 of the Regulations and Rules of Practice). NEW: With the application for a seed reproduced variety or by direct deposit soon after filling, the applicant must provide at least 3,000 viable untreated seeds of the variety per se, and for a hybrid variety at least 3,000 untreated seeds of each line necessary to reproduce the variety. Partial applications will be held in the PVPO for not more than 90 days; then returned to the applicant as un-filed. Mail application and other requirements to USDA, AMS, S&T, Plant Variety Protection Office, 1400 Independence Ave., S.W., Room 4512—South Building, Mail stop 0274, Washington, DC 20250. Retain one copy for your files. All items on the face of the application are self explanatory unless noted below. Corrections on the application form and exhibits must be initiated and dated. DO NOT use masking materials to make corrections. If a certificate is allowed, you will be requested to send a payment by credit card or check payable to "Treasurer of the United States" in the amount of \$768 for issuance of the certificates. Certificates will be issued to owner, not licensee or agent.

NOTES: It is the responsibility of the applicant/owner to keep the PVPO informed of any changes of address or change of ownership or assignment or owner's representative during the life of the application/certificate. The fees for filing a change of address; owner's representative; ownership or assignment; or any modification of owner's name is specified in Section 97.175 of the regulations. (See Section 101 of the Act, and Sections 97.130, 97.131, 97.175(h) of the Regulations and Rules of Practice.)

Plant Variety Protection Office

Telephone: (301) 504-5518 FAX: (301) 504-5291

General E-mail: PVPOmail@usda.gov

Homepage: http://www.ams.usda.gov/science/pvpo/PVPindex.htm

#### SPECIFIC INSTRUCTIONS:

To avoid conflict with other variety names in use, the applicant must check the appropriate recognized authority and provide evidence that the permanent name of the application variety (even if it is a parental, inbred line) has been cleared by the appropriate recognized authority before the Certificate of Protection is issued. For example, for agricultural and vegetable crops, contact: U.S. Department of Agriculture, Agricultural Marketing Service, Livestock and Seed Programs, Seed Regulatory and Testing Branch, 801 Summit Crossing Place, Suite C, Gastonia, North Carolina 28054-2193 Telephone: (704) 810-8870. http://www.ams.usda.gov/lsg/seed.htm.

#### ITEM

19a. Give:

- (1) the genealogy, including public and commercial varieties, lines, or clones used, and the breeding method;
- (2) the details of subsequent stages of selection and multiplication;
- (3) evidence of uniformity and stability; and
- (4) the type and frequency of variants during reproduction and multiplication and state how these variants may be identified
- 19b. Give a summary of the variety's distinctness. Clearly state how this application variety may be distinguished from all other varieties in the same crop. If the new variety is most similar to one variety or a group of related varieties:
  - (1) identify these varieties and state all differences objectively;
  - (2) attach replicated statistical data for characters expressed numerically and demonstrate that these are clear differences; and
  - (3) submit, if helpful, seed and plant specimens or photographs (prints) of seed and plant comparisons which clearly indicate distinctness.
- 19c. Exhibit C forms are available from the PVPO Office for most crops; specify crop kind. Fill in Exhibit C (Objective Description of Variety) form as completely as possible to describe your variety.
- 19d. Optional additional characteristics and/or photographs. Describe any additional characteristics that cannot be accurately conveyed in Exhibit C. Use comparative varieties as is necessary to reveal more accurately the characteristics that are difficult to describe, such as plant habit, plant color, disease resistance, etc.
- 19e. Section 52(5) of the Act requires applicants to furnish a statement of the basis of the applicant's ownership. An Exhibit E form is available from the PVPO.
- 20. If "Yes" is specified (seed of this variety be sold by variety name only, as a class of certified seed), the applicant MAY NOT reverse this affirmative decision after the variety has been sold and so labeled, the decision published, or the certificate issued. However, if "No" has been specified, the applicant may change the choice. (See Regulations and Rules of Practice, Section 97.103).
- 23. See Sections 41, 42, and 43 of the Act and Section 97.5 of the regulations for eligibility requirements.
- 24. See Section 55 of the Act for instructions on claiming the benefit of an earlier filing date.
- 22. CONTINUED FROM FRONT (Please provide a statement as to the limitation and sequence of generations that may be certified.)
- 23. CONTINUED FROM FRONT (Please provide the date of first sale, disposition, transfer, or use for each country and the circumstances, if the variety (including any harvested material) or a hybrid produced from this variety has been sold, disposed of, transferred, or used in the U.S. or other countries.)
- 24. CONTINUED FROM FRONT (Please give the country, date of filing or issuance, and assigned reference number, if the variety or any component of the variety is protected by intellectual property right (Plant Breeder's Right or Patent).)

USPTO 2/13/2013 Application Serial No. 61/764,057

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0581-0055. The time required to complete this information collection is estimated to average 1.4 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or part of an individual's income is derived from any public assistance program (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410, or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

## CLARIFICATION OF DATA IN EXHIBITS B AND C

Please note the data presented in Exhibit B and C, "Objective Description of Variety," are collected primarily at Johnston and/or Dallas Center, Iowa. The quantitative data in Table 1 are from two sample t-tests using data collected in the locations or environments shown. Qualitative trait data are presented from environments where the data best represents the variety(ies). The traits in Exhibit B collectively show distinct differences between the two varieties.

For the given year of data collection, our experimental design was set up so entries with similar maturities were planted near each other with one replication of the new variety grown in each environmental location. The experiment procedures generally involve two or three locations/environments with different planting dates, planted in 17.42 ft., 4 row plots for each variety. Approximately 24-30 plants emerged in each of the 4 rows for a total of around 96 to 120 plants being evaluated in each environment and 192 to 360 plants across locations or environments. For plant level traits, we sampled up to 20 representative plants from the middle 2 rows of the 4 row plot (group) of plants in each location/environment. For plot level traits we evaluated the 4 row plot (group) and gave a representative score or average on the 96-120 plants in the group within an experiment.

GROWING DEGREE UNITS (GDU)				PRECIPITATION (Inches)			
		2012	#100041F		2012	MA	
Month .	Johnston 1	Johnston 2	Dallas Center	Johnston 1	Johnston 2	Dallas Center	
April	14	-		0.68	-	-	
May	551	319	386	4.55	2.2	0.93	
June	708	708	668	3.16	3.16	1.41	
July	881	881	800	4.77	4.77	0.75	
August	667	667	615	3.25	3.25	2.59	
September	464	464	462	1.65	1.65	1.04	
Totals*	3285	3039	2930	18.06	15.03	6.72	

Growing Degree Units use following formula: GDU = ((T1+T2)/2)-50

Where T1 = minimum temperature for a given day with 50 degrees Fahrenheit as the minimum temperature used and 86 degrees Fahrenheit is the maximum temperature used.

Where T2 = maximum temperature for a given day with 86 degrees Fahrenheit as the maximum temperature used and 50 degrees Fahrenheit is the minimum temperature used.

GDUs are calculated each day and accumulated (summed) over certain number of days.

Please note: the 2012 growing season in Iowa was affected by historic drought and high temperatures. Analysis of variance between 2012 and the proceeding 14 years demonstrated that certain traits were more affected by these weather conditions than others. Ear diameter, Ear weight, Husk length and Kernel number per row showed higher than expected variance.

## Exhibit A: Origin and Breeding History for PH1W4Z

Pioneer variety **PH1W4Z**, an inbred of yellow corn (*Zea mays L.*), was developed by Pioneer Hi-Bred International, Inc. from a cross made in 2005 in Eau Claire, Wisconsin between PHWMK (PVP Certificate No. 200800269) and PHCPR (PVP Certificate No. 200500231) using the double haploid method of plant breeding. Varieties PHWMK and PHCPR are proprietary inbred lines of Pioneer Hi-Bred International, Inc.

During line development, crosses were made to inbred testers for the purpose of estimating hybrid combining ability. Yield trials were grown at Brookings, South Dakota and other Pioneer research locations.

The criteria used in the selection of **PH1W4Z** were yield per se and yield in hybrid combination. Late season plant health, grain quality, and stalk lodging resistance were important criteria considered during selection. Other selection criteria include: ability to germinate in adverse conditions, disease and insect resistance, pollen production and tassel size.

Variety **PH1W4Z** has shown uniformity and stability for 5 generations and for all traits observed as described in Exhibit C – Objective Description of Variety.

No variants have been observed or are expected in PH1W4Z.

#### **Developmental History**

- → The initial cross PHWMK x PHCPR was made in Eau Claire, Wisconsin in 2005.
- → The F1 seed was planted at Santiago, Chile in 2005 and induced to form haploid (H1) seed. The H1 seed was bulked.
- → The H1 seed was planted at Kekaha, Kauai, Hawaii in 2006 and induced to create a double haploid (D1).
- → The D1 seed was planted at Willmar, Minnesota in 2007 and self-pollinated. The D2 ears were selected.
- → The D2 seed was planted ear-to-row in Brookings, South Dakota in 2009 and self-pollinated. The D3 seed was bulked.
- ightarrow The D3 seed was planted ear-to-row at Santiago, Chile in 2009 and self-pollinated. The D4 ears were selected.
- ightarrow The D4 seed was planted ear-to-row at Brookings, South Dakota in 2010 and self-pollinated. The D5 ears were selected.
- → The D5 seed was planted ear-to-row at Puerto Vallarta, Mexico in 2010 and self-pollinated. The D6 ears were selected.
- → The D6 seed was planted at Brookings, South Dakota in 2011 and self-pollinated. The resulting D7 seed was bulked as the breeder seed.

### **Exhibit B: Statement of Distinctness**

Variety PH1W4Z is most similar to Pioneer Hi-Bred International, Inc. proprietary inbred line PHWMK (PVP Certificate No. 200800269). Variety PH1W4Z is significantly different from PHWMK in the following traits (see Table 1).

#### Variety PH1W4Z has:

- a shorter average husk extension length (4.2 cm for PH1W4Z vs 6.7 cm for PHWMK)
- a lesser average angle between the leaf and stalk (18.0 degrees for PH1W4Z vs 32.7 degrees for PHWMK)
- a wider average leaf width (8.3 cm for PH1W4Z vs 7.4 cm for PHWMK)
- a shorter average tassel central spike length (14.7 cm for PH1W4Z vs 24.6 cm for PHWMK)
- a shorter average tassel length (26.2 cm for PH1W4Z vs 42.4 cm for PHWMK)
- a shorter average tassel peduncle length (15.3 cm for PH1W4Z vs 21.5 cm for PHWMK)

Table 1: Data supporting differences between PH1W4Z and PHWMK. The varieties were grown in two locations having different planting dates and growing environments. A two-sample t-test was used to compare differences between means.

\*\* For these plot-level traits, kernels from approximately 5 representative ears were sampled. 100 unsized kernels were counted and weighed. Up to 500 grams of kernels were sized by a 13/64 inch slot screen.

Insect, disease, brittle snapping, yield and root lodging data are collected mainly from environments where variability for the trait can be obtained within the experiment.
